PORTFOLIO

Nanda Nurvika

About Me

I'm Nanda, a 6th-semester Information Systems student with a passion for UI/UX design and web development. I enjoy exploring how technology and design can work together to create meaningful, user-friendly digital experiences. My favorite part of coding is working with CSS, which lets me express my creativity by shaping the look and feel of a website.

Skills and Tools

Pemrograman: HTML, CSS, JS, PHP

Designing Tools: Figma, Canva

Modelling Tools: Draw.io

Project Showcase

UI/UX Design: Creating The Next Generation – "GenSehat" Mobile App

Studi Independen Bersertifikat (MSIB #7)
28 Oktober - 1 Desember 2024

GenSehat is a digital solution designed to prevent potential stunting as early as possible by providing accessible education, practical monitoring tools, and encouraging positive habits for teenagers up to women during pregnancy. [Prototype]

my work and contribution to the project:

Creating and setting up a style guide for colors and typography

Preview of some high-fidelity UI screen I designed

Built reusable UI components for the design system and prototyping purposes, including navigation bars, review indicators, accordions, buttons, flip cards, etc.

Designed wireframes for "Tumbuh Kembang" and "Pranikah" sub-menus.

Developed interactive prototype for "Tumbuh Kembang" and "Pranikah" sub-menus to support user testing.

UX Case Study – Redesign Wattpad Mobile App

Studi Independen Bersertifikat (MSIB #7)
19 September - 21 Oktober 2024

The project aims to create a smoother, more user-friendly, and accessible experience on Wattpad, ultimately increasing user satisfaction in navigating and discovering content. [Prototype] | [UX Research Plan & Report Deck] | [Usability Testing Plan & Report]

User Persona

UX Copy

Ideation Process

Before

After

The presence of highlighted content based on user choices, along with categories from "review tags" (great plot, well-written characters, and unique storyline), can help users find quality content more easily and motivate writers to improve the quality of their work.

Wattpad has "vote" and "comment" features, but to perform these actions, users must enter the reading page, which limits accessibility for users who are just browsing. Additionally, the "vote" and "comment" features cannot serve as a basis for overall reviews since they are given per chapter, not for the entire story.

Due to concerns that including a "rating" feature might confuse users since there is already a "vote" option, I replaced it with three "review tags" that effectively represent the criteria for quality stories: "Great plot," "Well-written characters," and "Unique storyline."

Personal Portfolio Website

Personal Project
30 Mei - 1 Juni 2024

nanda-zone.github.io/portfolio/

A website I designed and developed from scratch to showcase my projects, skills, and personal branding. Built using native HTML, CSS, and JavaScript.

COVID-19 Information Center Website

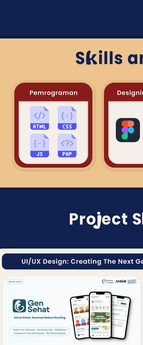
Final Project of Web Programming I
(2nd semester subject)
Juni 2023

nanda-zone.github.io/cic/

A basic informational website was built using native HTML, CSS, and JavaScript to demonstrate an understanding of website structure, layout, and basic styling.

certifications

Certificate of Participation – Studi Independen Bersertifikat Angkatan 7 (Kampus Merdeka)



Certificate of Completion – UI/UX Course

Certificate of Workshop & IT Bootcamp – Software Development

Certificate of Knowledge Proficiency – Database Systems
